The Periodic Table

Across

A carbon family member often mist of pencils	taken as an ingredient
 This first element of the 4th period, fertilizers 	, used to make
6Structure - Strong covalent bonds between atoms. (Giant)	3
7. This has 20 neutrons and is found in your teeth and bones	
8. Left-hand side of periodic table 4	
11. A horizontal row of elements on the periodic table	
12. Atomic radius across a period 6	
13. Elements in the same often have similar chemical and physical properties	7
	1. A gas with mass number 19 3 bonding happens between metals 5 Structure - Weak London forces between molecules. (Simple) 9. Right-hand side of periodic table 10. Center of periodic table/ transition metals 11. A member of the nitrogen family with 16 neutrons
COOL2BKIDS	Name:
